

PROJECT NAME: Central Park: A Technology-Based Pre-K Reading, Science, and Math Curriculum

RECIPIENT: Waterford Institute

LOCATION: Salt Lake City, Utah

PURPOSE: Funding would be used for development of Waterford's signature program, Central Park, for preschool-aged children. The program is designed to be an interactive software-based reading, math, and science curriculum for children, ages two to eight that teaches both educational and character education (non-cognitive) concepts. Central Park will be a web-delivered product with the intent that any family with the internet could access it. Funds would create additional staff hires in the form of 10-20 new jobs.

AMOUNT: \$250,000
